

NeuroShell Trader

The Spearman Indicator described by Dan Valcu can be easily implemented in the NeuroShell Trader using the NeuroShell Trader's ability to call external programs. The programs may be written in C, C++, Power Basic or Delphi.

After moving the Amibroker code given in the article to your preferred compiler and creating a DLL, you can insert the resulting Spearman Indicator as follows:

1. Select '**New Indicator ...**' from the '**Insert**' menu.
2. Choose the **External Program & Library Calls** category.
3. Select the appropriate **External DLL Call** indicator.
4. Setup the parameters to match your DLL.
5. Select the **Finished** button.

Users of NeuroShell Trader can go to the STOCKS & COMMODITIES section of the NeuroShell Trader free technical support website to download a copy of any of the Traders' Tips.
