

## NeuroShell Trader

The Projected Moving Average, it's prediction, the slope oscillator and the oscillator prediction can be easily implemented in the NeuroShell Trader by selecting 'New Indicator ...' from the 'Insert' menu and using the Indicator Wizard to create the indicators below:

Slope:  $\text{LinTimeReg Slope}(\text{Close}, 30)$

PMA:  $\text{Add2}(\text{Avg}(\text{Close}, 30), \text{Mul3}(\text{Slope}, 30, 0.5))$

PMA Prediction:  $\text{Add2}(\text{PMA}, \text{Mul3}(0.5, \text{Momentum}(\text{Slope}, 2), 30))$

Oscillator Prediction:  $\text{Sub}(\text{Mul2}(1.5, \text{Oscillator}), \text{Mul2}(0.5, \text{Lag}(\text{Oscillator}, 4)))$

Users of NeuroShell Trader can go to the STOCKS & COMMODITIES section of the NeuroShell Trader free technical support Website to download a copy of any of the traders' tips.
