NeuroShell Trader

The Rectangle Price Target indicator described by Markos Katsanos can be easily implemented in the NeuroShell Trader by combining a few of the NeuroShell Trader's over 800 indicators. After identifying a rectangle and annotating it on your chart using NeuroShell Trader's Trendline drawing tools, you can implement the indicator by selecting '**New Indicator …**' from the '**Insert**' menu and using the Indicator Wizard to create the following indicator:

Breakout Objective:
Add2 (*RectBoundar*y, Multiply (2.3, Power (*RectHeight*, 0.8)))
