NeuroShell Trader

The RSI Price Trends method described by Kevin Luo can be easily implemented with a few of NeuroShell Trader's over 800 indicators and one indicator from the Turning Points add-on for NeuroShell Trader that implements Luo's trend condition. The Turning Point Percent indicator computes the percent change in price between two arbitrary turning points.

BUY LONG CONDITIONS   RSI > 50
(both conditions must be true)   TURNING POINT PERCENT > 10 (Value adjusted for example stock)

SELL LONG CONDITION   TURNING POINT PERCENT < 10

Users of NeuroShell Trader can go to the STOCKS & COMMODITIES section of the NeuroShell Trader free technical support Website to download a copy of any of the traders' tips.
