

NeuroShell Trader

The Asymmetric RSI indicator described by Sylvain Vervoort can be easily implemented in the NeuroShell Trader using the NeuroShell Trader's ability to program functions in standard languages such as C, C++, Power Basic or Delphi. You can create the Asymmetric RSI indicator by moving the code given in the article to your preferred compiler and creating the corresponding function. You can insert the resulting indicator as follows:

1. Select '**New Indicator ...**' from the '**Insert**' menu.
2. Choose the **Custom Indicator** category.
3. Select the **ARSI** indicator.
4. Select the **Finished** button.

Users of NeuroShell Trader can go to the STOCKS & COMMODITIES section of the NeuroShell Trader free technical support website to download a copy of any of the Traders' Tips.
